Midmark Casework – the right choice for your clinic

Whether you’re remodeling or building a new clinic, Midmark modular casework not only improves clinic efficiency, it also enhances the look of your clinic for years to come.

Midmark casework is more durable than wood laminate casework and is warmer in appearance than stainless steel.

Our casework design team uses their experience and research to help you optimize workflow and create an aesthetically-pleasing workspace.

Midmark Casework – the right choice for your clinic

Built to last
Our unique metal frame design is durable, sustainable and modular to evolve with your practice.

Durable
Strong enough to stand up to the demands of a veterinary clinic.

Sustainable
Constructed with recycled content and composite wood components that are LEED compliant.

Modular
Flexible storage design that can be easily reconfigured as your clinic changes.

Other features include:
- The ability to be depreciated at an accelerated rate
- Can be taken with you if you move
- A clean, appealing look that you and your staff will greatly appreciate
- An unmatched five-year warranty
- A national sales and service support network.

Midmark casework is more durable than wood laminate casework and is warmer in appearance than stainless steel.
Functionality, flexibility and variety—Midmark understands

That’s why we offer a wide range of configurations to create practical, efficient solutions that are specific to your needs.

Midmark offers separate cabinet, table and sink units or an economical sink and cabinet combo unit that can save your clinic money.

Midmark’s full line of casework is designed to meet architectural standards. Its modularity enables you to remodel, move on demand and be flexible. No tools are required when changing drawer configurations.

Our casework is available with a wide variety of door and drawer insert colors and in several woodgrain, metallic and solid color options with integrated handles.

We offer a full product line that will easily integrate with our other equipment.

Are you leasing your clinic space? If you move, your Midmark casework can move with you.
Create the perfect solution for your treatment room.

Our space-saving chase designs allow you to have the equipment you need, where you need it, without sacrificing floor space. Let us help you create the most efficient, effective space possible.

Midmark casework chase units are pre-configured to arrive at your clinic ready for installation.

Wall mount light plates bolt securely to the chase unit so your 255 LED light can be positioned where you need it with no sag or drift.

Plumbing and electrical lines are neatly concealed within the chase. The pentagonal unit has convenient 4" access panels.
An exam room featuring Midmark casework can be designed especially for your clinic by our project coordinators so you’ll have an efficient workflow plus the choice of how you want to interact with your patients and clients.

Exam room solutions that work for you.

Midmark exam tables are available in 48" or 60" lengths, with or without overhang.
Midmark Casework – designed for the rigors of animal health environments.

Thermofoil Panels
Seamless panels provide a surface that is designed to resist spills, chemical degradation and delamination.

Maximize Space
Full extension slides are designed to be sturdy and allow you to use all available drawer space, including hard-to-reach spaces in the back.

Seamless Polystyrene Drawers
Rounded corners and one-piece construction are designed to contain spills, be easily and effectively cleaned, and handle the daily rigors of the medical environment.

Anti-microbial Pulls and Countertops
EPA-registered* anti-microbial pulls and surfaces help complement your current asepsis procedures.

Inteirs are Configurable
so you can change you cabinets to accommodate any workflow. And, because of the steel-on-steel structure, slide attachments and hinges have significantly more strength than wood cabinets.

Thermofoil Panels

Our compact, durable cart and treatment cabinet systems provide space for instruments, supplies and even a writing surface.

Dual Wheel Casters
provide maneuverability and the flexibility to position the unit where needed.

Custom Configurations

Midmark’s in-house design team helps you visualize your space using 3D renderings that match the specifications of your hospital.

Our state of the art design system allows you quickly choose layouts, colors and finishes. An expansive list of options will ensure your Midmark casework is tailored to you. Let our expert designers consult with you on how to create a layout that fits within your workflow and budget while improving the aesthetics and efficiency of your space.
Specifications
